efforts at coordination between nations are at the heart of the challenges of globalization despite steadily growing interdependencies individual nations still have specific interests that present obstacles to globalization while some challenges inspired by the need to coordinate are viewed as inevitable by many they are less optimistic about prospects for success jan erik lane argues that one should focus objectively upon the possibility of failures lane analyzes four kinds of challenges to interdependency all of which are growing in geopolitical relevance first countries need to diminish their dependency on fossil fuel and shift to a reliable supply of energy because fossil fuels are diminishing second environmental degradation must be addressed because it is accelerating under the strain of earth s population lane advocates an ecological footprint approach third a single global market economy and its complexities must be addressed as national economies are increasingly opened finally as traditional state sovereignty

weakens foreign military intervention in both international and intra state conflicts increases governments are attempting to address these interdependencies or reply to the challenges they pose mainly through international organizations and regionalism these efforts are discussed at length in addition problems with international law are reviewed as lane warns against the utopian hopes of global constitutionalism globalization also examines the potential consequences of failing to address the need for coordination in efforts to address shared global challenges

this book explores the question of how the multiplication of judicial decisions on international law has influenced the way in which legal findings in international law adjudication are justified international law practitioners frequently cite judicial decisions to persuade courts interpreting international law are no exception to this practice however judicial decisions do much more than persuading they enable and constrain interpretive discretion instead of taking the road of the sources of international law this book turns to the somewhat uncharted terrain of legal argumentation using international criminal law as a case study it shows how the growing number of judicial decisions has normalised courts resort to them in legal justification and enabled some argumentative practices to become constitutive of international law in so doing it critically revisits the implications of an iterative use of judicial decisions and reassesses the influence of the judicialisation turn on the ways in which the meaning of international law is formed shaped and reshaped by reference to judicial decisions

this unique new work of reference traces the origins of the modern laws of warfare from the earliest times to the present day relying on written records from as far back as 2400 bce and using sources ranging from the bible to security council resolutions the author pieces together the history of a subject which is almost as old as civilisation itself the author shows that as long as humanity has been waging wars it has also been trying to find ways of legitimising different forms of combatants and ascribing rules to them protecting civilians who are either inadvertently or intentionally caught up between them and controlling the use of particular classes of weapons that may be used in times of conflict thus it is that this work is divided into three substantial parts volume 1 on the laws affecting combatants and captives volume 2 on civilians and volume 3 on the law of arms control this second book on civilians examines four different topics the first topic deals with the targetting of civilians in times of war this discussion is one which has been largely governed by the developments of technologies which have allowed projectiles to be discharged over ever greater areas and attempts to prevent their indiscriminate utilisation have struggled to keep pace the second topic concerns the destruction of the natural environment with particular regard to the utilisation of starvation as a method of warfare and unlike the first topic this one has rarely changed over thousands of years although

contemporary practices are beginning to represent a clear break from tradition the third topic is concerned with the long standing problems of civilians under the occupation of opposing military forces where the practices of genocide collective punishments and or reprisals and rape have occurred the final topic in this volume is about the theft or destruction of the property of the enemy in terms of either pillage or the intentional devastation of the cultural property of the opposition as a work of reference this set of three books is unrivalled and will be of immense benefit to scholars and practitioners researching and advising on the laws of warfare it also tells a story which throws fascinating new light on the history of international law and on the history of warfare itself

this book asks whether there any limits to the sorts of religious considerations that can be raised in public debates and if there are by whom they are to be identified its starting point is the work of richard rorty whose pragmatic pluralism leads him to argue for a politically motivated anticlericalism rather than an epistemologically driven atheism rather than defend rorty s position directly gascoigne argues for an epistemological stance he calls pragmatist fideism the starting point for this exercise in what rorty calls cultural politics is an acknowledgement that one must appeal to both secularists and those with religious commitments in recent years reformed epistemologists have aimed to establish a parity of epistemic esteem between religious and perceptual beliefs by exploiting an analogy in respect of their mutual vulnerability to sceptical challenges through an examination of this analogy and in light of wittgenstein s on certainty this book argues that understood correctly the parity argument in fact lends epistemological support to the argument that religious considerations should not be raised in public debate the political price paid paying the price of politics is worth it the religious thinker is provided with a good reason for maintaining that their practices and beliefs are not undermined by other forms of religious life
